

# 12A A3 All-in-One Creasing, Scoring & Perforating Machine

## Crease, Score and Perf

Why Crease, score and perf?

Digitally printed and offset printed sheets on coated papers need to be pre creased, scored and perforated before folding, otherwise the print surface will crack, leaving an ugly scar across the page. The 12A A3 allows you to gently break the paper grain, providing a crease, hinge and score while at the same time pushing the printed image into the paper, thus eliminating cracking altogether

### Specification:

**Model** Binder IB12A A3

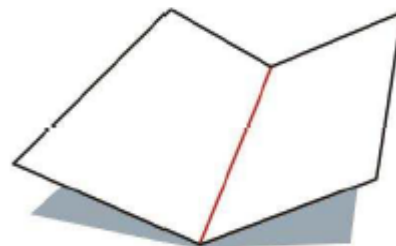

**Scoring width** 460mm

**Scoring depth** 0.5-1mm

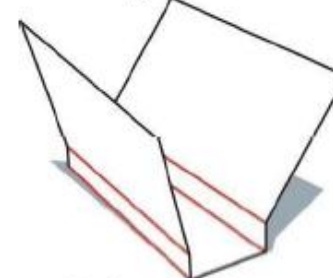

**Paper thickness** Up to 50mm

**Weight** 10.2kg

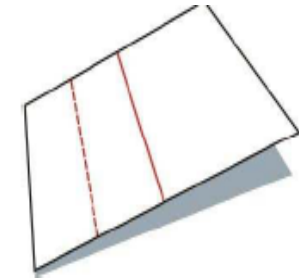

**Outer Dimensions** 645\*530\*165mm

- Single Crease -

- Spine & Hinge -

- Perf & Crease -

## Introduction:

The all-in-one machine is designed for crease, score and perf. It works manually, to make good look covers and easily opened (referring to Pic.4)

Place cover between the book thickness rings and adjust the width, Then machine can be ready for each crease, score and perf (referring to Pic.2)

It can crease, score card stock up to 50mm. No make ready is needed. The all-in-one machine is designed for easy operation, with single creasing, double scoring and dash scoring available (Pls referring to Pic 1). It is simple to replace the pins and switch the die (Pls referring to Pic.3)
